

Junde Li

303 Electrical Engineering West, State College, PA, 16802
Tel.: (814)-699-0752 Email: jul1512@psu.edu Homepage: jundeli.github.io

Education

Pennsylvania State University

Jan. 2019 – Present

PhD student in Computer Science and Engineering

Advisor: Swaroop Ghosh

City University of Hong Kong

Oct. 2016

MSc in Engineering Management, GPA: 4.02/4.3, ranked 1/88

Qingdao University

Jun. 2015

BSc in Logistics Management, GPA: 82.69/100

Research Interests

Autonomous Systems, Quantum Machine Learning, SoC Design. I am interested in machine learning, computer vision, autonomous vehicles, robotics, and their FPGA embedded system design and optimization, and quantum machine learning.

Publications

C4. **J. Li**, S. Ghosh. (2020). Inverse Relabeling for Efficient Machine Unlearning. Advances in Neural Information Processing Systems (NeurIPS). (In Preparation)

C3. **J. Li**, S. Ghosh. (2020). Quantum Soft QUBO Suppression for Accurate Object Detection. European Conference on Computer Vision (ECCV). (Under Review)

C2. **J. Li**, N. Gattu, S. Ghosh. (2020). FAuto: An Efficient GMM-HMM FPGA Implementation for Behavior Estimation in Autonomous Systems. International Joint Conference on Neural Networks (IJCNN).

C1. **J. Li**, M. Alam, A. Ash-Saki, S. Ghosh. (2020). Hierarchical Improvement of Quantum Approximate Optimization Algorithm for Object Detection. International Symposium on Quality Electronic Design (ISQED). (Invited paper)

J1. **J. Li**, Q. Ma, A. Chan, & S. Man. (2019). Health Monitoring through Wearable Technologies for Older Adults: Smart Wearables Acceptance Model. Applied Ergonomics. (2019) 162-169.

Work Experiences

Pennsylvania State University

State College, PA

Research Assistant, Advisor: Swaroop Ghosh

Quantum-Classical Machine Learning: 1) Formulated bounding box suppression of object detection as QUBO problem, and utilized hybrid quantum-classical quantum approximation optimization algorithm for detection bounding box suppression; 2) We developed another new hybrid algorithm, Quantum-soft-QS, by harnessing quantum supremacy, for improving object detection accuracy compared to traditional non-maximum suppression.

A.I. SoC Design and Optimization: Holistically introduced the application of Hidden Markov Model

with Gaussian emissions for autonomous vehicles, and designed and optimized a customized FPGA system on chip; it achieved 10.39x speedup compared to software implementation, and power efficiency of 2.59 TOPS/W.

Pennsylvania State University

(Head) Teaching Assistant, CMPSC 360 Discrete Mathematics
Hold weekly recitation classes and office hours

State College, PA
Spring 2019 - Present

Matrix Auto Technology Ltd

A.I. Software Engineer (Autonomous Driving)
Advisor: Jean Lam

10/2018 – 12/2018

Hong Kong

MAT is a startup company providing self-driving car solutions and services.

1. Participated in developing vehicle localization using particle filter, based on initial location from sensors;
2. Designed self-driving car workflow prototype based on paper review on environmental perception, localization, path planning, prediction and control.

ASM Pacific Technology Ltd

Process Engineer (R&D)

07/2018 – 10/2018

Hong Kong

Advisor: Damon Deng, Pak Kin Leung

ASMP is a leading integrated solution provider in semiconductor and electronics industries.

1. Pre-processed images taken from silicone pads for recognizing wafer ID by Photo OCR pipelines;
2. Coordinated with control, mechanical, software and vision teams for making machine improvements;
3. Conducted research and development in computer vision and application for visual inspection.

City University of Hong Kong

P/T Research Assistant

07/2016 – 12/2018

Hong Kong

Advisor: Alan Chan

Department of System Engineering and Engineering Management

1. Took part in several research projects associated with Human Factors, Data Analytics, and Machine Learning in fields of risk-taking behaviors of construction workers, and health technology;
2. Designed the research processes, proposed suitable research methods, and applied research grant as co-I.

Professional Services

Reviewer for IEEE Transactions on Mobile Computing

Sub-reviewer for IEEE Embedded Systems Letters

Sub-reviewer for Design Automation Conference

Sub-reviewer for International Conference on Hardware/Software Co-design and System Synthesis

Sub-reviewer for International Conference on Computer Design

Sub-reviewer for ACM/International Symposium on Low Power Electronics and Design

Honors and Awards

Self-driving Car Nanodegree, Udacity 2018

Distinction, City University of Hong Kong 2016

Outstanding Student Thesis Award, Qingdao University 2015

Excellent Student Award, Qingdao University 2013

Merit Scholarships, Qingdao University 2011 - 2013

Technical Skills

Programming Languages: Python, C/C++, MATLAB, Java, R

Deep Learning Toolboxes: Pytorch, Tensorflow, Caffe, OpenCV

Hardware: Verilog, High-level Synthesis
